

## Gain the Insight to Improve Quality, Efficiency and Performance

Healthcare executives are faced with increasing pressures to improve performance and cut costs while dealing with complex decisions on governance, risk and compliance issues. To make better-informed decisions that will drive improved clinical care and operational efficiency, healthcare providers need an integrated view of data from multiple sources – simply and rapidly.

Zanett Healthcare and Business Analytics enables healthcare providers to gain a single view of the organizational data and the insights necessary to ultimately improve quality of care, cost efficiency and overall enterprise performance.

## Benefits of Analytics Solutions

### Timely, Actionable Information

Zanett Healthcare and Business Analytics transforms data across the executive, clinical, research, and operations functions into actionable information through our robust analytics features. This enables organizations to much more quickly gather critical data, and then analyze it, obtain insights from it, and operationalize it for higher efficiencies across the enterprise.

### Advanced Data Warehousing

Designed specifically for healthcare providers, Zanett Healthcare and Business Analytics enable organizations to gather data from various internal and external sources—such as electronic health records, clinical departmental systems, patient accounting—into a single repository, which eliminates disparate “silos” of information. As an Oracle Platinum Partner and Microsoft Certified Gold Partner, we leverage leading technologies that deliver the most value to your organization.

### Standardized Formats and Flexible Reporting Tools

Information from our solution is delivered in standardized, automated formats, so organizations can more easily prioritize and streamline their data analysis efforts. Out-of-the box reports can be used for immediate data aggregation, and flexible, Web-based reporting tools can be used to build custom analytics – reducing time-to-implementation and lowering costs of development.

### Fast-Track Option

Zanett Healthcare and Business Analytics can be quickly implemented as a first release of a business intelligence solution. Leveraging a proven fast-track methodology with proven healthcare data models can result in a quicker time-to value, increased ROI, and a higher degree of assurance that the first phase implementation will be a solid foundation for the future.

## SOLUTION OVERVIEW

Developed specifically for healthcare providers, Zanett Healthcare and Business Analytics integrates a proven data warehousing platform with pre-built analytics solutions, for optimized decision-making and efficiency:

- ▶ Provides a comprehensive view of the clinical and operational information to all levels of management and staff
- ▶ Reduces risk
- ▶ Lowers costs of development
- ▶ Increases and accelerates return on investment

## Data Model

Zanett Healthcare and Business Analytics is built upon a comprehensive and integrated data model specifically for healthcare providers, allowing you to track such key performance indicators as:

- ▶ Activity – Census, Beds, Encounters (Admissions, Visits, Discharges)
- ▶ Financials – Revenue, Costs, Profit
- ▶ Medical Staff – Utilization, Quality, Charts
- ▶ Human Resources – Employees, Benefits, Utilization
- ▶ Patient Care – Clinical Indicators, Patient Support, Serviced, Patient Safety
- ▶ Payors – Profiles, Utilization, Performance
- ▶ Quality – Key Indicators, Measures, Survey Results
- ▶ Markets – Markets, Employers, Legal Issues

## Ad-Hoc Reports

Through Zanett Healthcare and Business Analytics, a healthcare organization can implement ad-hoc reporting quickly and easily without increased development costs. Ad-hoc reporting includes:

- ▶ Key Performance Indicators for Patient Billing
- ▶ Budget Reports by Healthcare Organization, Account, and Business Unit
- ▶ Financial Reports for Business Units by Organization Detail
- ▶ Trends – Payor Mix for Claims
- ▶ Trends – Clinical Encounters
- ▶ Trends on Employee Status by Organization and Business Unit
- ▶ Trends on Key Performance for Physician Status
- ▶ Trends on Capital Projects Costs by Project, Organization and Business unit
- ▶ Trends on Patient Activity in Hospitals and Clinics
- ▶ Trends on Physician Quality Outcomes

## Getting Started

To get started with the Zanett Healthcare and Business Analytics, we are pleased to offer you a **complimentary Healthcare Analytics Workshop**. During this half-day workshop, we review the current use and sources of your data, major processes, opportunity and pain areas, and short- and long-term needs. By determining the current state vs. desired state, we can then help you outline an improvement plan for the future from a healthcare information technology “best practices” approach.
