

Improve Access to Information Across the Healthcare Continuum

Historically, Integrated Healthcare Delivery Networks are data rich, but information poor. Multiple 'stand-alone' clinical and financial systems contain valuable information; however, these systems are not integrated and require different interfaces to access data. This approach has created information silos, which restrict high-level information flow and effective access to data, and cause a lack of communication and coordination between different information sources.

Enterprise Portals are the path towards improved collaboration across the healthcare continuum. When strategically planned and aligned with the business, enterprise portals can support the expanding need for patient access, provide for intelligent resource scheduling, enhance physician collaboration, foster employee engagement, improve the ability to access information, and becomes a foundation for enhanced innovation and growth.

Enterprise Portal Deployment

The development and implementation of enterprise portals requires innovation and focus. Zanett Healthcare partners with you to establish a vision for your enterprise portal that ultimately improves the collaboration between patients, caregivers, employers, and payers. Our methodology includes:

- ▶ Align IT with goals of business and set IT investment priorities to maximize support of those goals whether they be Administrative Portals, E-Business, Patient and Consumer-Centric, Provider and Content
- ▶ Evaluate investment decisions based upon value that can be created and supported by realistic business cases
- ▶ Create a Strategic IT Plan to guide investment, design and infrastructure decisions
- ▶ Drive architectural simplicity, reuse and flexibility throughout technology environment
- ▶ Demand and confirm near-term business results from development efforts
- ▶ Build information structures that provide real operational leverage for business

Leading Technologies

To assist healthcare organizations develop a portal solution, Zanett provides ready-to-use deliverables using industry-leading Microsoft and Oracle technologies. The benefits are improved patient satisfaction, risk reduction, reduced time-to-implementation, lower costs of development and higher (as well as faster) return on investment.

Getting Started

To get started on the path towards improved access to information, we are pleased to offer you a **complimentary Enterprise Portal Workshop**. During this half-day workshop, we review your current organizational structure, major processes, opportunity and pain areas, and short- and long-term needs. By determining the current state vs. desired state, we can then help you outline an improvement plan for the future from a healthcare "best practices" approach.

SOLUTION OVERVIEW

Zanett Healthcare delivers Enterprise Portal solutions that enable your organization to:

- ▶ Support the expanding need for patient access
- ▶ Provide for intelligent resource scheduling
- ▶ Enhance physician collaboration
- ▶ Foster employee engagement
- ▶ Improve the ability to access information to improve the quality of care
- ▶ Improve the internal brand to be realized in the market
- ▶ Stimulate enhanced innovation and growth
